

## **Toyo Seikan Kaisha, Ltd. Aseptic Rotary Filler Receives Low-Acid Acceptance and Letter of Non-Objection from FDA**

**TOKYO JAPAN, January 8, 2009** -- Toyo Seikan Kaisha, Ltd. announced that the FDA Office of Food Safety has issued a Letter of Non-Objection for its Taste P600A Rotary Aseptic Bottle Filling Technology using FMC's Clarity™ peracetic acid based sterilant for use in aseptic packaging of low acid products.

The National Food Laboratory served as the Process Authority, developing and performing the efficacy and safety validation tests for the filing of the Taste P600A aseptic filler in Japan.

The Taste P600A Rotary Filler is capable of filling light weight PET bottles at speeds up to 600 bpm (16oz. Bottle). With a 20 year history in PAA Aseptic Filling Systems and a track record of selling, installing and maintaining 30 systems, Toyo Seikan Kaisha's latest system offers high production efficiency with minimal sterilant usage and reduced waste water discharge.
